Put Your R/C Car Under Computer Control: 10 Steps

What we're going to do is open up the RC car, remove the existing electronic controller, and replace it with the Kitronik motor driver that controls 2 DC motors. We will connect the two torque motors to one controller and the steering motor to the other controller. After the motor driver is connected, we will use a micro:bit to control it.

RC Car and Truck | Radio Control Remote Control | RC Planet

You can communicate through the speaker on the belly of the vehicle or listen to what it hears through your phone/tablet. You can also enable motion mode which allows you to use your device gyroscope to control the vehicle with (by tilting your phone around), in case you don't want to use the on-screen analog sticks. It's really quite functional.
