Freshwater Crayfish Aquaculture In North

Freshwater Crayfish Aquaculture in North America, Europe, and Australia is the first text to summarize the methods of culture for the eight most important crayfish species in the world. Methods developed to culture crayfishes around the world differ significantly, and this book enables readers to develop workable strategies for cultivating different crayfish species in specific environments.

Freshwater crayfish (Redclaw) | AgriFutures Australia

In our pond-based aquaculture farm we grow the tropical North Queensland crayfish called red claw (*Cherax quadricarinatus*) which is a native freshwater crayfish from the region. We produce redclaw for the local market, but we have specialised in all things pre grow-out; so that's broodstock, egg production, crayling production and soon a nursery.

Tasmanian giant freshwater crayfish - Wikipedia

The red claw crayfish (*Cherax quadricarinatus*), referred to throughout the rest of this fact sheet simply by its Australian synonym 'redclaw', is a tropical species native to the rivers of north-west Queensland and the Northern Territory in Australia. Although well known to the local inhabitants of this isolated region, it remained effectively unknown to the rest of the world until the late 1980s, when it was trialled for aquaculture.

Crayfish farming taking root in BC - Aquaculture North America

Virtually all crawfish culture also relies on natural reproduction rather than stocking hatchery-reared juveniles. The predominant cultured species in North America, the red swamp (*Procambarus clarkii*) and white river crawfish (*P. zonangulus*), are classified as "temperate" species; that is, they will tolerate cold winter conditions. Both species, however, possess a number of traits that are usually associated with animals that live in warm waters.

New Zealand Clearwater Crayfish (Koura) Ltd

Crawfish (or crayfish) have social, economic and ecological significance in several regions around the world, including the southern United States. Louisiana dominates the crawfish industry of North America in both aquaculture and wild capture fisheries.
