Gleaner AGCO - MANUALS-EPC.COM

Gleaner combines date from 1923, when the Baldwin brothers of Nickerson, Kansas, created a high-quality and reliable self-propelled combine harvester. They decided to use the "Gleaner" name for their radically redesigned grain harvesting machine based on inspiration from "The Gleaners", an 1857 painting by Jean-François Millet.

The "K2" combine was built to handle grain heads from 10 -15 feet wide, and corn heads in either 2 or 3 rows. By now a factory cab was standard on all Gleaner combines which featured AC and or heat. When the "K2" original was released it had a grain tank capacity of 68 bushels, but in 1978, grain tank extensions were offered which brought the K2's bin capacity up to 96 bushels.

gleaner m2 combine operators manual - Free Textbook PDF

Combine Feeder House Chain Position Lower: Headers with retractable fingers in the auger, chain should be up. Heads with NO retractable fingers, fully flighted auger, chain should be down.
