Handbook of natural fibres / Vol. 2 / Processing and ...

A natural fibre is any fibre that exists as such in the natural state, such as cotton, wool or silk (Houck, 2009). Natural fibres differ from each other in cross-sectional shape, colour, surface contour, chemical structure as well as length and width (Ziabicki, 1976). The natural textile fibres can be classified into three groups - vegetable, animal and mineral - according to their origin.

Identification of natural textile fibres - ScienceDirect
