Still, it's possible to not have any previous history of CKD before getting diagnosed with stage 3. This could be due to the fact that stages 1 and 2 don't typically cause any noticeable symptoms.

### **History of Nephrology 10 · GIN - Anno 33 - Suppl. 66 ...**

The kidney participates in whole-body homeostasis, regulating acid-base balance, electrolyte concentrations, extracellular fluid volume, and blood pressure. The kidney accomplishes these homeostatic functions both independently and in concert with other organs, particularly those of the endocrine system.
