Lecture 5: The Edgeworth Box Framework Stanford University | Econ 51 | Prof. Christopher Makler Supplementary Notes - Not Necessarily Complete or Polished - Do Not Publish 5.1 From Endowments to Allocations The simplest economy to consider has two people and two goods. Let's think back to the notes from Lecture 2, when we met (Alison and Bob), each of whom had some oreos (good 1) and ...

Stochastic Processes - Stanford University

Ng's research is in the areas of machine learning and artificial intelligence. He leads the STAIR (Stanford Artificial Intelligence Robot) project, whose goal is to develop a home assistant robot that can perform tasks such as tidy up a room, load/unload a dishwasher, fetch and deliver items, and prepare meals using a kitchen.

For on-campus students, your attendance at lectures with guest speakers is expected! You will get 0.5% per speaker (1.5% total) for attending. Since SCPD students can't (easily) attend classes, they can instead get 0.83% per speaker (2.5% total) by writing a 'reaction paragraph' based on listening to the talk; details will be provided.
