The University of Texas at Tyler is committed to the prevention of discharges of oil to navigable waters and the environment, and maintains the highest standards for spill prevention control and countermeasures through regular reviews, updating and implementation of this SPCC Plan for its facility in Tyler, Texas.

Spill Prevention, Control, and Countermeasure (SPCC) for ...

NIH is committed to preventing discharges of oil and other potential contaminants to navigable waters and the environment, and to maintaining the highest standards for spill prevention, control, and countermeasures. The Environmental Protection Agency (EPA) regulates the Oil Pollution Prevention and Response Regulation under 40 CFR 112.

SPILL PREVENTION, CONTROL, AND COUNTERMEASURES (SPCC) PLAN

Spill Prevention Control and Countermeasures (SPCC) Introduction: Oil spills endanger public health, impact drinking water, devastate natural resources and disrupt the economy. Spills can happen during production, storage, or transport. Every effort must be made to prevent oil spills, and to clean them up promptly when they occur.

SPILL PREVENTION, CONTROL, AND

Who should take Spill Prevention, Control, and Countermeasure? This course is ideal if you're involved in developing an SPCC plan for your facility. According to the EPA, a facility is under the SPCC rule if it has an aggregate aboveground oil storage capacity of more than 1,320 U.S. gallons and there is a reasonable expectation of an oil discharge near U.S. waters or shorelines.

Spill Prevention Control and Countermeasure (SPCC)

A spill prevention, control and countermeasures plan must discuss how the facility meets the requirements for oil spill prevention and containment. The plan must detail in writing the

equipment, workforce and steps required to prevent, control and mitigate an oil discharge. The general requirements for SPCC plans are located in 40 CFR 112.7.

Spill Prevention, Control and Countermeasures (SPCC) Plans ...

The Spill Prevention Control Countermeasures (SPCC) rule establishes the equipment and procedures to prevent discharges of oil into waters of the United States. Under the rule, facilities with an aboveground capacity greater than 1,320 gallons of oil must identify any container with \geq 55 gallons that could potentially reach waterways.

Spill Prevention Control and Countermeasure (SPCC)

When oil is spilled, it can endanger public health and the environment, as well as cost millions of dollars in clean up and disposal. To prevent oil contamination of navigable waterways and adjoining shorelines, the U.S. Environmental Protection Agency created the Spill Prevention, Control, and Countermeasure rule.

Oil Spills Prevention and Preparedness Regulations | US EPA

§ 112.8 Spill Prevention, Control, and Countermeasure Plan requirements for onshore facilities (excluding production facilities). If you are the owner or operator of an onshore facility (excluding a production facility), you must:

Spill Prevention Control And Countermeasures

The purpose of the Spill Prevention, Control, and Countermeasure (SPCC) rule is to help facilities prevent a discharge of oil into navigable waters or adjoining shorelines. The SPCC rule requires facilities to develop, maintain, and implement an oil spill prevention plan, called an SPCC Plan.

Spill Prevention, Control, and Countermeasure Plan

The Oil Pollution Prevention regulations, administered under the authority of the United States Environmental Protection Agency (US EPA), require certain facilities to prepare and implement a Spill Prevention, Control, and Countermeasure (SPCC) Plan to reduce or eliminate oil discharges to navigable waters of the United States. SPCC

Spill Prevention Control and Countermeasures | Department ...

The Oil Pollution Act includes two sets of requirements, the Spill Prevention, Control, and Countermeasure (SPCC) and the Facility Response Plan (FRP). The SPCC is the cornerstone of the EPA's spill prevention regulations, while the FRP determines the spill response supplies and training required for facilities handling large amounts of oil.
