Xterra engines are quite large and powerful, typical for body-on-frame SUV. The first generation was equipped with inline-4 cylinder KA24DE, n/a V6 VG33E and supercharged VG33ER. To make a long story short, I may have an opportunity to purchase a 2002 Nissan Frontier (4WD, crew cab) that's been in North Carolina since new for a pretty cheap price. 150,000 miles, clean, straight body, runs and drives excellent (I'm told). The VG33E is an awesome motor. I say all SOHC NA VG's, HP wise, are gutless. The SOHC was originally designed for turbo in mind. In turbo form, they are extremely powerful, and very well worth the cost of conversion. However, if your looking for some decent gains while staying NA, try slapping on some headers, cams, and adjustable cam gears.
